CHIA  
QUINOA  
RAW CACAO  
PURPLE CORN  
YACON  
SUPER-BERRIES

Vegan . Whole Grain . Complete Protein . Antioxidants  
Essential Minerals . B Vitamins . Dietary Fiber . Low GI

Breakfast is the most important meal of the day but as city-dwellers, we understand how challenging it is to prepare a quick and nutritious breakfast amid our busy schedules. It doesn't help that the variety of cereals found on our supermarket shelves often come with additives and packed with added sugars (such as cane sugar, fruit juice concentrate, brown sugar, sucrose, lactose, glucose, high-fructose corn syrup, etc) to make them more palatable to a mass audience. Added sugars are sugars which are not naturally occurring in the main ingredients but are added to improve the overall taste of the cereal. These provide unnecessary empty calories and can be seen on the list of Ingredients on the label.

Nature's Superfoods ORGANIC SUPERFOOD CEREALS (ready-to-eat) range is impressively different – it is **'clean'** (no added sugars/additives), **nutrient-dense** (made **entirely** of wholesome organic superfoods), **gluten-free** and **naturally high in dietary fiber**.

Gluten Free . Dairy Free . Soy Free . Non-GMO . No Added Sugars, Additives, Preservatives
